

## Azure Fundamentals

### Homework - 2

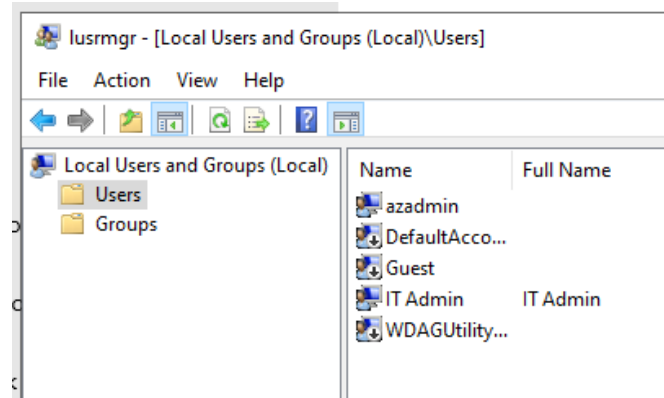

1) Please create a VM in Azure from portal and name the server: TSServer1

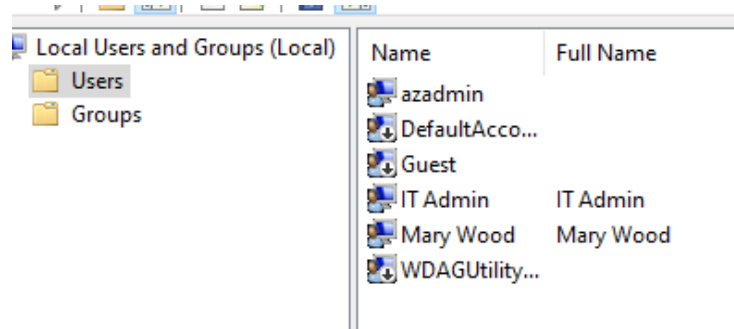

UN: azadmin

PW: P@ssword12345

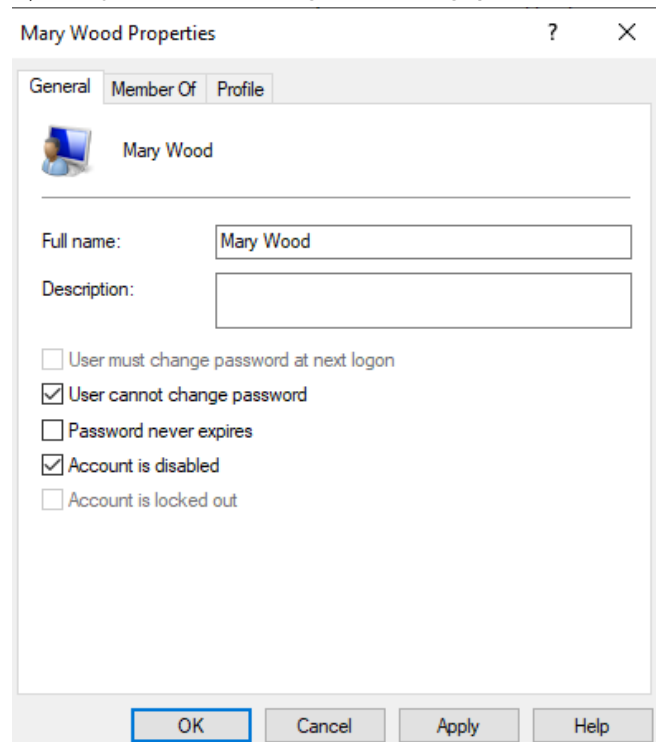

2) Login to the VM and create a new user from control panel called ITAdmin

3) Create a standard user called Mary Wood

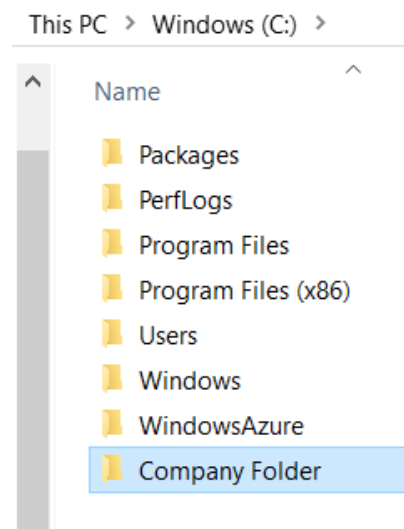

4) Mary is now no longer working, please disable her account.

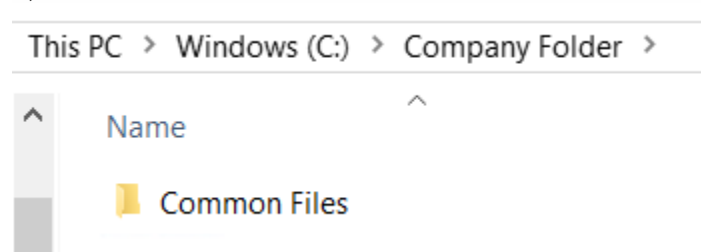

5) Please create another VM using Bash and call it TSFileServer

```
carlos@Azure:~$ az vm create \
> --resource-group HW_Lab \
> --name TSFileServer \
> --image win2016datacenter \
> --admin-username azuser \
> --admin-password P@ssw0rd1234
```

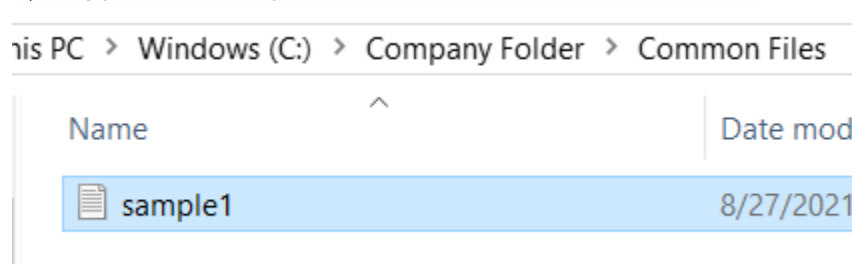

6) Create a folder called "Company Folder" in C drive in that server.

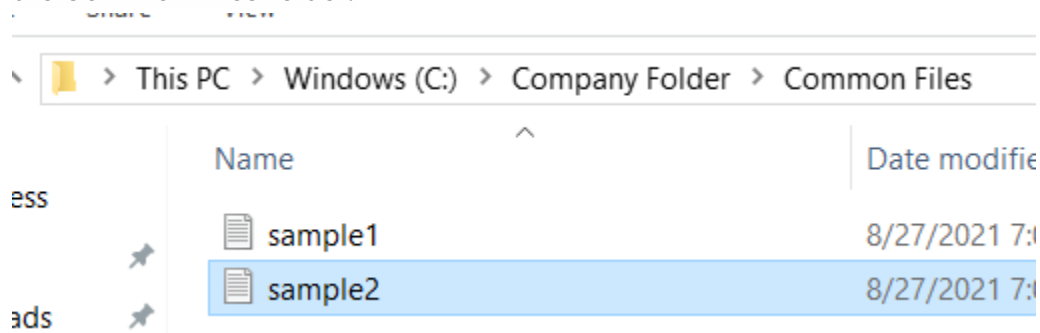

7) Create a subfolder called "Common Files" inside Company Folder

8) Copy a file from your PC to this Common Files folder

9) Open a notepad in the File server and save it in Common Files, now you will have 2 files in the Common Files folder.

10) Take screenshot of your work and shutdown your servers, ensure to change to deallocated mode.

## Virtual machines
